

IN THE CLAIMS:

Please cancel claims 2-4, 9-15, 20-21, 26-27 and 31 without prejudice or disclaimer.

Please amend the claims as follows:

Claim 1. (Currently Amended) A sanitary seat cover assembly for a toilet bowl seat, said sanitary seat cover assembly comprising:

sanitary seat covers having a body part covering ~~along the a~~ top surface of the seat with a predetermined area ~~range~~ and a neck part ~~extensively protruded correspondingly~~ corresponding to a portion where the seat is hinged ~~at the body by a part of the seat,~~ and

a supporting frame for maintaining the shape of the sanitary seat covers, ~~and the support frame~~ having a clamp,

~~wherein the clamp selectively fixes~~ fixing the neck part of a ~~plurality of the~~ sanitary seat covers ~~which are piled and overlapped one another~~ at the ~~portion~~ part where the seat is hinged,

the supporting frame includes an external frame to cover around an edge of the sanitary seat covers in a shape of a plate facing one side of the sanitary seat covers fixed by the clamp,

the external frame being selectively attached or detached from the supporting frame and the external frame detachably including an auxiliary frame having a portion cut to a depth in a piling direction of the seat covers, and coverlets being fixed along at least one of a front, a center in a width direction and a back side of the auxiliary frame,

the auxiliary frame being rotated around a hinged portion of the supporting frame.

Claims 2-4. (Cancelled)

Claim 5. (Currently Amended) The sanitary seat cover assembly according to Claim 1, wherein the sanitary seat ~~cover~~ covers further ~~comprises~~ include a withdrawing grip which is extensively protruded from ~~the~~ an edge of the body part.

Claim 6. (Currently Amended) The sanitary seat cover assembly according to Claim 5, wherein ~~in the the sanitary seat cover~~ a plurality of the withdrawing grips ~~is~~ are bound in a state where the grips are folded at one side of the sanitary seat covers so as to be overlapped.

Claim 7. (Currently Amended) The sanitary seat cover assembly according to Claim 1, wherein the body part has an additional withdrawing grip which is extended and protruded from ~~the~~ a surface of the edge of the sanitary seat ~~cover~~ covers.

Claim 8. (Currently Amended) The sanitary seat cover assembly according to Claim 1, wherein the sanitary seat covers are piled with ~~their~~ the neck parts bound into a pack ~~with a binder~~ by the clamp and a cut line is added at the neck part between the portion pressed by the ~~binder~~ clamp and the body part.

Claims 9-15. (Cancelled)

Claim 16. (Currently Amended) The sanitary seat cover assembly according to Claim 1, further comprising an internal frame at ~~the~~ a center of the supporting frame to cover around ~~the~~ an internal edge of the sanitary seat covers in correspondence with ~~the~~ a shape of ~~the~~ a cut center portion of the sanitary seat covers.

Claim 17. (Original) The sanitary seat cover assembly according to Claim 16, wherein the internal frame is selectively attached or detached from the supporting frame of the sanitary seat covers.

Claim 18. (Currently Amended) The sanitary seat cover assembly according to Claim 16, wherein ~~the internal region of the internal frame has an accommodating part for accommodating things including a user's back supporting cushion, paper, books or newspapers~~ objects.

Claim 19. (Twice Amended) The sanitary seat cover assembly, as defined in claim ~~14~~1, further comprising a water-stopping ~~groove~~ furrows along ~~the~~ a lateral wall circumference in ~~the~~ a lateral wall of ~~the~~ an internal frame and ~~the~~ external frames frame in contact with the sanitary seat covers.

Claims 20-21. (Cancelled)

Claim 22. (Currently Amended) The sanitary seat cover assembly according to Claim 1, further comprising additional coverlets mounted over the supporting frame of the sanitary seat covers to selectively cover ~~the~~ an external portion of the sanitary seat covers along with the supporting frame, thereby preventing the sanitary seat covers from being exposed to ~~the~~ an outside humid environment.

Claim 23. (Currently Amended) The sanitary seat cover assembly according to Claim 22, wherein the coverlets are formed in ~~the~~ a shape of plates to cover to ~~the~~ a lateral portion of ~~the~~ an edge of the sanitary seat covers ~~including the exposed front portion of the supporting frame and hinged to the top of the supporting frame of the sanitary seat covers~~.

Claim 24. (Currently Amended) The sanitary seat cover assembly according to Claim 22, wherein the ~~one or more~~ coverlets ~~comprises~~ at least one of films which is made of synthetic resin including

include a vinyl product and ~~is~~ are fixed at ~~the~~ a top of the supporting frame which covers ~~up to the~~ a lateral portion of the an edge of the supporting frame as well as ~~the~~ a front portion of the supporting frame of the sanitary seat covers.

Claim 25. (Currently Amended) The sanitary seat cover assembly according to Claim 22, wherein the coverlets comprise four coverlets: a first coverlet fixed at the external frame ~~of the peripheral of the top edge of the supporting frame to extensively cover the internal frame with a predetermined area range;~~ a second coverlet extended with a predetermined width ~~to the~~ in a direction of the external frame ~~along the internal frame of the supporting frame;~~ a third coverlet extended with a predetermined width ~~to the~~ in a direction of ~~the~~ an internal frame along the external frame ~~at both sides of the supporting frame;~~ and a fourth coverlet extended to ~~the~~ a bottom of the supporting frame from ~~the~~ a bottom of the internal frame, and ~~wherein~~ respective coverlets are overlapped one with another ~~with~~ at a predetermined width and are made of a material that ~~can be~~ is flexibly transformed when the sanitary seat covers are withdrawn ~~out~~.

Claims 26-27. (Cancelled)

Claim 28. (Currently Amended) The sanitary seat cover assembly according to Claim 5, wherein ~~the~~ a top of the sanitary seat covers are folded ~~with its bottom part including the neck part with respect to the center of the body part,~~ and a plurality of withdrawing grips ~~extended~~ extending from ~~the~~ a top edge of the body part are folded to ~~the~~ an opposite side with ~~their~~ external portions piled and fixed by the ~~binder~~ clamp.

Claim 29. (Currently Amended) The sanitary seat cover assembly according to Claim 28, wherein the supporting frame of the sanitary

seat covers is divided into the top and bottom portions ~~correspondingly~~ corresponding to the a shape of the half-folded sanitary seat covers, ~~the top of which includes an accommodating part to store a bound pack of the remaining sanitary seat covers.~~

Claim 30. (Currently Amended) The sanitary seat cover assembly according to Claim 28, further comprising an additional coverlet on the supporting frame of the sanitary seat covers to protect the sanitary seat covers from the an outside humid environment ~~in a natural state.~~

Claim 31. (Cancelled)

Claim 32. (Currently Amended) A sanitary seat cover assembly ~~comprises~~ comprising:

a seat hinged to the a back portion of the a top of a body part of a toilet bowl to be rotated and placed on the body part;

sanitary seat covers having a ~~body part that covers the~~ portion covering an upper surface of the seat with a predetermined area range and a neck part extended and protruded ~~correspondingly~~ corresponding to ~~a portion~~ an area where the seat is hinged from the body part;

a supporting frame of the sanitary seat covers to maintain and support the shape of the sanitary seat covers, and ~~to comprise~~ including a ~~cramp~~ clamp hinged with the seat to selectively fix the neck part with more than two sanitary seat covers overlapped and piled at the a hinged portion; and

connectors selectively fixed and fastened at the an edge of the seat corresponding to the an edge of the supporting frame of the sanitary seat covers,

~~wherein~~ the seat and the supporting frame of the sanitary seat covers ~~are being~~ tightly placed with the connectors fastened to make a tightly closed atmosphere.

Claim 33. (Currently Amended) The sanitary seat cover assembly according to Claim 32, further comprising guards for supporting ~~the~~ an edge of the sanitary seat covers ~~correspondingly to the rotation of the supporting frame at the supporting frame.~~

Claim 34. (Currently Amended) The sanitary seat cover assembly according to Claim 33, wherein the guards are formed at the ~~external~~ edge of the ~~positioned~~ sanitary seat covers ~~correspondingly to a predetermined area range and~~ are connected to a supporting rod ~~that supports the portion extended to the direction hinged with the supporting frame to subsequently move and rotate both sides, and~~

~~wherein the sanitary seat cover~~ covers further ~~comprises~~ include elastic means ~~at the supporting frame having the supporting rod to provide~~ for providing elasticity when the guards ~~approach elastically to~~ approach the supporting frame.

Please add new claims 35-38 as follows:

Claim 35. (New) A sanitary seat cover assembly for a toilet bowl seat, said sanitary seat cover assembly comprising:

sanitary seat covers having a body part covering along a top surface of the seat with a predetermined area and a neck part corresponding to a portion where the seat is hinged at a part of the seat; and

a supporting frame for maintaining the shape of the sanitary seat covers, the support frame having a clamp,

the clamp selectively fixing the neck part of the sanitary seat covers at the part where the seat is hinged,

the sanitary seat covers being piled with the neck parts bound into a pack by the clamp and a cut line is added at the neck part between the portion pressed by the clamp and the body part,

the clamp having an opening for insertion of the neck parts of the sanitary seat covers and fixing the sanitary seat covers in a pressed state by the sanitary seat covers elastically moving to a natural state after insertion in the clamp.

Claim 36. (New) A sanitary seat cover assembly for a toilet bowl seat, said sanitary seat cover assembly comprising:

sanitary seat covers having a body part covering along a top surface of the seat with a predetermined area and a neck part corresponding to a portion where the seat is hinged at a part of the seat; and

a supporting frame for maintaining the shape of the sanitary seat covers, the support frame having a clamp,

the clamp selectively fixing the neck part of the sanitary seat covers at the part where the seat is hinged,

the sanitary seat covers being piled with the neck parts bound into a pack by the clamp and a cut line is added at the neck part between the portion pressed by the clamp and the body part,

the clamp including a pressing plate to tightly press the neck parts of the sanitary seat covers between a hook and a lever linked from a lateral wall of the supporting frame, a band lever to press the neck part of the sanitary seat covers with a pressing plate corresponding to a rotational position of the lever.

Claim 37. (New) A sanitary seat cover assembly for a toilet bowl seat, said sanitary seat cover assembly comprising:

sanitary seat covers having a body part covering along a top surface of the seat with a predetermined area and a neck part corresponding to a portion where the seat is hinged at a part of the seat; and

a supporting frame for maintaining the shape of the sanitary seat covers, the support frame having a clamp,

the clamp selectively fixing the neck part of the sanitary seat covers at the part where the seat is hinged,

an internal frame at a center of the supporting frame to cover an internal edge of the sanitary seat covers in correspondence with a shape of a cut center portion of the sanitary seat covers, the internal frame being selectively attached or detached from the supporting frame of the sanitary seat covers.

Claim 38. (New) A sanitary seat cover assembly for a toilet bowl seat, said sanitary seat cover assembly comprising:

sanitary seat covers having a body part covering along a top surface of the seat with a predetermined area and a neck part corresponding to a portion where the seat is hinged at a part of the seat; and

a supporting frame for maintaining the shape of the sanitary seat covers, the support frame having a clamp,

the clamp selectively fixing the neck part of the sanitary seat covers at the part where the seat is hinged,

coverlets mounted over the supporting frame of sanitary seat covers to selectively cover an external portion of the sanitary seat covers along with the supporting frame, thereby preventing the sanitary seat covers from being exposed to an outside humid environment,

the coverlets including four coverlets: a first coverlet fixed at the external frame; a second coverlet extended with a predetermined width in a direction of the external frame; a third coverlet extended with a predetermined width in a direction of an internal frame along the external frame; and a fourth coverlet extended to a bottom of the supporting frame from a bottom of the internal frame, and respective coverlets being overlapped one with another at a predetermined width and being made of a material that is flexibly transformed when the sanitary seat covers are withdrawn out.

IN THE DRAWINGS:

A Letter to the Official Draftsman is attached with proposed drawing corrections to Figure 1.

The attached sheet of drawings includes changes to Fig. 1. This sheet, which includes Figs. 1 and 2, replaces the original sheet of Figs. 1 and 2.
